

DISCOUNT COMPUTERS, INC.

In the July edition of the Newsletter, there was an article called "Protect your new Computer"

It was a great article, about how you need to "devote a few hours" when you buy a new computer from big box stores or mail-order, by yourself with no help.

After reading that article, it made us realize that when you buy a PC from us, it is like getting *First-Class concierge service!*

First, your new PC will have the operating system, and the programs "you" choose, with the most current updates and drivers available. Your data will be copied from your old Computer. All printers, external devices, that you bring in, will be set-up. To make sure everything is perfect your personal trainer will give you a 2 hr. orientation, followed by as many individual training sessions you want. All completely FREE!

Doesn't this sound a lot easier to you, than buying from a big box store?

Maybe that is why we are still here after 20 years!

Relax you have our Computer!
